

Dear FCC Members: I am writing to comment on XM Radio. This is a service that I agree to pay for and the Nat'l Association of Broadcasters has no business in telling me what I can or can't pay to listen to, as long as it is legal. In relation to the matter of instant traffic and weather, I feel that since they do not offer such a service, they do not want XM to offer it. This is a great service allowing one to get weather info anywhere in the country. And, I can be in Phoenix and find out the weather in one of many of the channels they offer in other parts of the country, instantly. America is built on challenges and innovation and just because the NAB does not like the innovation of XM radio, is no reason to pull the plug on such programming.

Sincerely,

Mercer E. Weiskotten  
Satisfied XM Radio Subscriber
